

## Danger Level 2 - Moderate

**Tendency: Increasing avalanche danger**  
on Saturday 10 02 2024

Wind slab

Snowpack stability: **very poor**

Frequency: **some**

Avalanche size: **small**

### Fresh wind slabs require caution.

During the night mostly small wind slabs will form in gullies and bowls and behind abrupt changes in the terrain as well as at high altitude. They can be released easily. or in isolated cases naturally,. In isolated cases the avalanches in these regions are medium-sized. The wind slabs are to be bypassed in steep terrain.

Apart from the danger of being buried, restraint should be exercised in view of the danger of avalanches sweeping people along and giving rise to falls.

### Snowpack

10 to 20 cm of snow will fall until the early morning above approximately 2000 m. During the night the wind will be storm force adjacent to ridgelines. The wind slabs will be deposited on the unfavourable surface of an old snowpack in particular on shady slopes.

### Tendency

Saturday: Down to 1200 m snow will fall over a wide area. For this reason the danger of dry avalanches will increase during the day to level 3 (considerable).

## Danger Level 1 - Low

**Tendency: Increasing avalanche danger**  
on Saturday 10 02 2024

Wind slab

2000m

Snowpack stability: **very poor**

Frequency: **few**

Avalanche size: **small**

### Fresh wind slabs require caution.

During the night small wind slabs will form in the vicinity of peaks. They can be released easily, or in isolated cases naturally,.

Apart from the danger of being buried, restraint should be exercised in particular in view of the danger of avalanches sweeping people along and giving rise to falls.

### Snowpack

2 to 5 cm of snow will fall until the early morning above approximately 2200 m. During the night the wind will be storm force. The small wind slabs will be deposited on the unfavourable surface of an old snowpack in particular on shady slopes.

### Tendency

Saturday: Down to 1200 m snow will fall over a wide area. For this reason the danger of dry avalanches will increase during the day to level 3 (considerable).
